

IN THE CLAIMS:

Please amend the claims as shown in the listing of claims that follows with each claim including a status identifier pursuant to 37 CFR 1.121.

Claims 1-3. (Canceled)

Claim 4. (New) A medical apparatus with light flux for biologic treatments, comprising:

an artificial light source and optic filter;

a case;

a support that is set on a foot plate, that bears a light source bulb ventilated by a fan set inside the case;

a concave mirror set on an axial handlebar, on the wall of the case;

an optic filter set on an objective and located on an opposite wall in a slit of the case;

a rotating shutter disc is set on said opposite wall with the optic filter, equipped with a slit regulating device, having orifices c and d that become coaxial on an optic filter axis;

wherein processed light flux is made of rays reflected by the concave mirror and of direct rays reflected by the source of light; and wherein the light flux passes through the orifices c and d of the shutter disc and straighten to the objective, inside of which the optic filter is set.

Claim 5. (New) The medical apparatus of claim 4, wherein the rotating speed of the shutter disc is run by an engine, ventilated by a fan, assisted by a digital modulator of the light flux.

Claim 6. (New) The medical apparatus of claim 4, wherein a computer controls the entire apparatus' handling and coordinating.

Claim 7. (New) The medical apparatus of claim 5, wherein a computer controls the entire apparatus' handling and coordinating.
